SUMMARY

Web developer building purpose-built websites and fully functional web applications with Astro, React, TypeScript, and Node.js. I start from what each project actually needs—dashboards, internal tools, client-facing platforms—and ship high-performance features tailored to how people really use them.

EXPERIENCE

Web Developer, N-Compass TV / NTV360 Jul 2026 – Present
Cebu City

- Built web applications and websites for company dealers, shaping features and functionality around each dealer's needs
- Contributed franchise dashboard features to systematize and streamline the developer workflow
- Maintained and extended web features across internal tools and client-facing platforms

AI Profile Support, Dedale Intelligence Nov 2025 – Oct 2026
Remote

- Outsourced to build AI profiles for the company's clients using Gemini and Claude
- Formatted every profile to the company's standards for consistent, client-ready output

IT Intern (OJT), N-Compass TV / NTV360 Jan 2026 – May 2026
Cebu City

- Built interfaces for internal tools and platform features
- Developed comprehensive template galleries for various trades
- Performed QA testing on showcase modules

ESL Teacher, Happy Planet 2024 – 2025
Remote

- Conducted English language lessons for international students
- Developed personalized communication strategies

PROJECTS

Kwaderno — An offline-first notebook for DepEd teachers — class records, attendance, automatic DepEd grade computation, SF2 and grade sheets, item analysis, AI-drafted lesson plans, and an RPMS portfolio, all from the phone's browser. (JavaScript, PWA, Claude) meet-kwaderno.vercel.app

Montejo's Lechon *in progress* — Our family business website for Montejo's Lechon & Food Trays in Argao, Cebu — menu, party packages, and ordering for charcoal-roasted lechon since 1994. (Astro, TypeScript, CSS, JavaScript) montejoslnft-online.vercel.app

Nook — A cozy notebook that lives in your browser — notes, to-dos, sticky notes, and scrapbook pages with a photo booth, all encrypted locally with AES-256. No account needed. (JavaScript, HTML, CSS) cozy-nook-olive.vercel.app

Internship Tracker — Professional management dashboard for tracking internship hours and administrative progress in real-time. (Astro, Python, TypeScript, JavaScript) internship-tracker-self.vercel.app

TicketFlow — Visual automation tool for generating high-quality, numbered tickets and certificates from custom templates. (Astro, CSS, JS) ticket-automation-two.vercel.app

Certify — Event management platform featuring automated certificate distribution and real-time claim tracking. (TypeScript, CSS, JavaScript) automate-n-certify.vercel.app

EDUCATION

B.S. Information Technology 2022 – 2026
Cebu Technological University - Argao Campus

TECHNICAL SKILLS

Development: JavaScript, TypeScript, React, Astro, Tailwind CSS, Vite, Node.js
Build & Optimization: Web App Development, Performance Optimization, Responsive Design, Figma
AI & Prompt Engineering: Prompt Engineering, Claude Code, Gemini
